

Communicating your science

In this talk, we will focus on communicating and promoting your work effectively, with special attention on online presentations. We'll discuss impact and impact factors, improved oral and poster presentations, communicating to the general public/media, the benefits of social media and an online presence, and the open science movement.

Lecturer: Dr. David Peralta

David earned his B.S. and Master's degree in Chemistry at the Ateneo de Manila University, Philippines. In 2009, he moved to Heidelberg for his Ph.D. at the German Cancer Research Center (DKFZ) and University of Heidelberg. Shortly after his Ph.D., he worked as an Assistant Editor at Wiley-VCH in Germany for the journals *ChemistryOpen*, *ChemistrySelect*, and *ChemMedChem*. He has been the Editor-in-Chief of *ChemMedChem* since 2017. Aside from doing his editorial tasks for the Wiley-VCH journals, he has also given numerous workshops internationally on all topics related to scientific publishing and communication.

Link to platform POPR where you can register:
